PROFESSIONAL EXPERIENCE

Disney Entertainment & ESPN Technology | San Francisco, CA

Dec 2024 – May 2026

Senior Software Engineer, MLP — Ad Platforms

- Architecting end-to-end self-service ML platforms (**Feast**, Unity Catalog, **DynamoDB**, **MLflow**, **Databricks**) covering feature stores, schema migrations, online inference, and automated champion deployment across Hulu and Disney+ ad products.
- Built standardized inference container with canary rollout, SLO-based auto-rollback, and **Airflow**-orchestrated daily scoring and retraining pipelines serving production ad-targeting models.
- Recovered ~**1.8M** missing Hulu-on-Disney+ users by diagnosing an upstream identity pipeline gap and coordinating a cross-team production fix; reduced 30-day XGBoost training runtime by ~**40%** via GPU acceleration (Databricks CUDA).
- Developed scalable monitoring dashboards tracking model drift, latency, and SLO compliance; consolidated three legacy feature store repos into one unified framework, cutting maintenance overhead by **66%**.

AJ Tutoring | Los Gatos, CA

Jan 2024 – Dec 2024

Computer Science Tutor

- Formulated algorithmic training modules and system design templates to accelerate debugging and core engineering workflows.
- Translated distributed computing and data structures concepts into modular, test-driven learning pathways.

Chapman University — ML & Assistive Technology Lab | Orange, CA

May 2023 – Dec 2023

Research Assistant

- Engineered Python-based VR research environments supporting **200+** concurrent users, optimizing sensor-to-database pipelines and leading cross-platform mobile development for accessibility research.

Pillar | Mountain View, CA

May 2022 – Dec 2022

Software Engineer Intern

- Built and deployed a regression model (Scikit-learn, Node.js) for renovation cost estimation, improving accuracy by **18%** with sub-200ms API latency.
- Prototyped a computer vision pipeline (PyTorch) to auto-categorize job-site photos, reducing manual tagging time by **40%**.
- Analyzed user behavior (SQL, Python) to identify UX friction points, driving a **15%** increase in engagement metrics.

Seedstages | Claremont, CA

Mar 2021 – Dec 2021

ML Engineer Intern

- Designed the company's first automated ML pipeline with repeatable workflows for training, validation, and deployment.
- Built a real-time feature store for contractor-client matching (improving API response times by **15%**) and an NLP text-classification service with a **15%** accuracy gain (Scikit-learn, NLTK).

PROJECTS

RAG Ops — Football Intelligence Platform

- Stack:** Python, LangChain, FAISS, FastAPI, Langfuse, RAGAS, Docker
- Production RAG pipeline with **Langfuse** observability, **RAGAS** evaluation (faithfulness **0.874**), cost tracking, 34 TDD tests, deployed on Railway.

Stream Vault — Streaming Feature Store

- Stack:** Python, Feast, Kafka, Redis, Delta Lake, Docker
- Dual-write consistency (Delta Lake offline, Redis online), automated parity validation, CI-integrated drift detection, sub-100ms online retrieval.

Sentinel — ML Serving Pipeline

- Stack:** Python, MLflow, FastAPI, Docker, Kubernetes, Prometheus, Grafana
- Containerized ML serving with **MLflow** registry, canary rollout, SLO-based auto-rollback, real-time drift monitoring via Evidently AI.

TECHNICAL SKILLS

- Distributed Systems & Infrastructure:** Apache Kafka, Apache Spark, PySpark, Redis, Feast (Feature Store), Delta Lake, Hive, Apache Airflow (MWAA), Terraform, Kubernetes, Docker, FastAPI, React, Node.js
- Languages:** Go, Python, Java, C++, SQL, Scala, JavaScript, GraphQL
- Cloud & MLOps Orchestration:** AWS (SageMaker, S3, DynamoDB, Athena, Glue), Databricks (Unity Catalog, MLOps Stacks), CI/CD (Jenkins, Spinnaker, Liquibase)
- Observability & Validation:** Prometheus, Grafana, Langfuse, RAGAS, InfluxDB
- ML Compute Workloads:** PyTorch, TensorFlow, XGBoost, Scikit-learn, FAISS, LangChain

EDUCATION

Chapman University (Fowler School of Engineering) | Orange, CA

May 2023

Bachelor of Science, Data Science

Spoken Languages: English (fluent), Tamil (fluent), Spanish (intermediate)
